Sir/Ma'am,

I would like to express my interest in the Internship being provided by your platform. I am a self motivated and progress driven Student. I have all the basic skills and the right attitude to learn all the new technologies thrown at me. Having started with web development, I have learned all the building blocks necessary for the next big challenge i.e. utilizing the cutting edge technologies and frameworks used at your organization to scale my knowledge all the while being a contributor to the development of your organization by making use of it. With my knowledge and the will to improve myself combined with relevant skills I believe I will certainly be a value addition to your organization.

I have been constantly honing my skills and acquiring new knowledge relevant to this field each and every day while trying to be at least a percent better than yesterday. I am a creative thinker who likes to learn and implement newer and complex ideas to challenge my creative side. I follow the principle of learning by doing which gives me in depth knowledge of the technology I pursue.

I am an open minded person ready to adapt to fast paced and changing environments and am also highly motivated by the recent developments in the technology field. I enjoy brainstorming and finding various approaches to solve the same problem. Additionally I am proficient in both English and Hindi which helps me communicate with all kinds of people.

Apart from the technical skills, I have also acquired and honed my soft skills through my earlier working roles, where I have exercised many skills from communication, management, to team efforts. In all my earlier roles I have always paid extra attention to the deadlines set by my managers and has been able to deliver the work always on time.

Please review my enclosed resume and related documents for additional details regarding my expertise and achievements.

Looking forward to your response and thank you for your consideration.

Thanks and regards,
Kushagra Madhukar
